

THIRTEEN SENSES

CONTACT

If only there was time
To say it all
I'd say it all
If only every sound
That I make
Said it all

(Chorus)
Distant
Warning
Contact
Warning
Out of control

Wake up from your sleep
It's not a dream
It's not a dream
Everything is air
On a breeze
It's good for me

(Chorus)

ALL THE LOVE IN YOUR HANDS

All the signs are there
I do not exist
Underneath the stars and comets
Far beneath the sun
Eyes can see anything they want to believe

I was breathing all the oxygen that's left
I surrender
Put my hands up in the air
I waited for you there

(Chorus)
But you left an everlasting breath
I saw the cold air
It wrapped me up and went
With all the love in your hands

I believe in love
Because of you
Everything is put aside now
Watch me in a daze
Seconds knew that I fall apart without you

I was breathing all the oxygen that's left
I surrender
Put my hands up in the air
I waited for you there

(Chorus)

ANIMAL

I lost my control today
Something came and ate it away
Tears trickle down your face
As quickly as it comes it escapes

Now you
You'll never get this far off the ground
Throwing all designs where you found
You'll never get that far from me now
And I need just take one more look around

Science made us skin and bone
Turn us into earth and stone
The time it takes to fade away
Is time enough to find a place

Now you
You'll never get this far off the ground
Throwing all designs where you found
You'll never get that far from me now
And I need just take one more look around

And I, I cant decide
If I'm prepared to fight
Your eyes they come alive
At night so you can fight
Like an animal
Like an animal

THIRTEEN SENSES

CALL SOMEONE

Call someone
Tell them how you feel
Call someone and tell them what you think is wrong
Beat the ground
Show it how you feel
Show it all the ways that you've been taught to feel

(Chorus)

And the bigger you are
The harder you fall
You just need to call and let someone know
And the faster you think
Is the time that you'll need
Just to say hello

Waste some time
Trying not to breathe
Trying to be hard on all and everything
Change of heart
Changing how you feel
Call someone and let them know how good you feel

(Chorus)

Nothing ever happens
Nothing ever fits
But you're keeping up with it
Gonna take one more connection
A one that you fixed
And you make use of it

(Chorus)

FOLLOW ME

Follow me and I will take you in
Finally you get to see what we think

I didn't show up today
I only disappeared
A missing detail of how I should feel
The memory has been erased, yeah

If you really want to escape
You don't belong here

(Chorus)

Follow me and I will take you in
Finally you get to see what we think
Aaah

Turn the lights out and be on your own
Outside your window they'll be watching you now
The memory has been erased, yeah
They were ordering you all to kill

(Chorus)

I find it in the air
I saw it in the air
Its sounds, it's sounding like its there
I fall around the air

Follow me and I will take you in
Finally you get to see what we think

A LOT OF SILENCE HERE

It seems predictable but I don't have a clue
Of what you want right now
Talk is measured in the same breath every time
And what I want is time

This is the last straw and I feel like letting go
Any state of mind can be traded in with you

It seems predictable a lot of silence here
And what I want is here
The skies above are just reflections in your eyes
They're out of touch and time

This is the last straw and I feel like letting go
Any state of mind can be traded in with you

You're telling it like it is
Showing us how it is
Telling us what is broke and
Showing us what is fixed
It's complicated I don't want to bring you down

THIRTEEN SENSES

SPIRALS

If I could set you free
And give you what you need
Then all my energy is lost

If I divide our time
And give you half of mine
Then all my energy is lost

I keep seeing spirals at my feet
I keep seeing spirals at my feet

If I could set you free
And give you what you need
Then all my energy is lost

Alarms begin to ring
I notice everything
And all my little plans have been lost

I keep seeing spirals at my feet
I keep seeing spirals at my feet

TALKING TO SIRENS

The sirens only call
They call when you are gone
The sirens talk a lot
And I talk back too

From the back of my head
To the back of my neck

(Chorus)
You must have come (quickly)
When you heard the sirens talk to me
And you know your way (perfectly)
And you have such rhythm in your feet

The battle's just begun
It's already been won
It feels like ecstasy
It feels much more to me

From the tip of my tongue
To the top of my lungs

(Chorus)

Ooooh ooh ooh

Always lost when there's nothing to gain
Always won when you're the only one playing

(Chorus)

UNDER THE SUN

You can find it anywhere under the sun
You can find it in your heart if you look hard
You can know your way around and be lonely
You can tear us all apart and be on your way

There's a fire burning up under the sun
There's desire in your heart where it don't belong
You can see the planets turn under the sun
And the light that shines on you is the only one
Yeah the light that shines on you is the only one

The air begins to feel a little colder
The air begins to show a little time
The air begins to know what you are thinking
The air can see a trouble in your eye

So tell nobody you're on your own
And find somebody to take you home
To take you home

You can find it anywhere under the sun
You can find it in your heart if you look hard
You can know your way around and be lonely
You can tear us all apart and be on your way
You can tear us all apart be on your way

The air begins to feel a little colder
The air begins to show a little time
The air begins to know what you are thinking
The air can see a trouble in your eye

So tell nobody you're on your own
And find somebody to take you home
To take you home

THIRTEEN SENSES

SPARK

Another spark has set you off
And I don't know the way
The buzzing of a satellite
That tracks us night and day

Aaah but it takes us longer
Aaah but it makes us stronger

Another spark has set you off
Against recovery
The burning of a healthy heart
Surrenders like a dream

Aaah but it takes us longer
Aaah but it makes us stronger

All our consciousness drifts away

I was led out
I can't walk away
There were eyes all over me
I stopped breathing
Only just halfway
There were eyes all over me

ONES & ZEROS

I know your body's like a cloud
Floating around the softer side of things you know
I know you like to let it out
For me its just a kind of pressure coming out

Oh no
How did it come to this
Making your way back home
Thinking oh no
What is it about this
And trying to break the code

I bet there's something in the air
A tiny drug to keep our bodies unaware
There's little fractures wearing out
For me its nothing but the numbers adding up

Oh no
How did it come to this
Making your way back home
Thinking oh no
What is it about this
And trying to break the code

YOU & I

I wasn't watching you perfectly still
I'm near perfectly dazed
Out of a hollow room into a space
Fire and water and space
Further and further away

I find you watching me turn out the light
I find you turning to stone
You lost control when the air became thin
You say you always pretend
Its always the way in the end

And you and I
Are thoughts in their minds

Out come the dark lines and further away
Logic is out of control
I wasn't paying attention at all
I was just counting the gold
Yeah I was just caught in the cold

And you and I
Are thought in their minds
